What's your decision?

Last week's Question Answered:

When a striker fouls and the cue ball stops in a position where the curved face of the cushion obstructs the object ball, is it a snooker and therefore a free ball awarded?

The cue-ball cannot be snookered by a cushion. If the curved face of a cushion obstructs the cue-ball and is closer to the cue-ball than any obstructing ball not on, the cue-ball is NOT snookered.
